Slow Computer?

This continues the previous newsletter that that may be found at <http://wolffpro.net/newsletter>

As always backup all critical files first:

(try this for free: <http://www.wolffpro.com/bu/solutions/index.cfm>)

1. Clean up the disk. To open Disk Cleanup click **Start**, point to **Programs**, point to **Accessories**, point to **System Tools**, and then click **Disk Cleanup**. After it runs choose those items such as recycle, Temporary internet Files, Temporary Offline Files. I do not recommend compressing old files.

2. Uninstall unneeded programs (especially those that run at startup and/or put something in the system tray. Anything in your System Tray is running in the background using memory and CPU. Weather Bug is notorious for slowing down a computer. Also remove programs that might be for printers or devices you no longer have.

(to be continued in future issues)

Wolff Pro is pleased to announce that we are partnered in a special program with **DriveSavers Data Recovery, Inc.**

Has your hard drive failed completely.

Take advantage of these special benefits:

- * 10% discount off professional data recovery fees
- * No Data—No Charge policy if data is unrecoverable. *
- Fastest turnaround time —24 to 48 hours!

[DriveSavers](#)

[Wolff Pro, LLC](#) is a Dell Registered Partner.

We have certified technicians. This brings a new level for stress free help when you need it.

Registered Partners have access to Dell's full range of products and services. Plus, Registered Partners receive an additional discount off the purchase price. From customized Dell™ systems to off-the-shelf peripherals. Our preferred customers pay no markup on orders- only a flat order processing fee on orders that do not require our expert installation.

-

We look forward to helping you in the future. Please send any questions you may have- asking for help is always free!
